Art Unit: 1625

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 2 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Only extraction of the aqueous phase with a hydrocarbon of 3-10 carbon atoms is enabled, to leave in said aqueous phase the relatively polar impurities present after washing impure propylene oxide with water and to extract significant amounts of propylene oxide. See the example at p. 6 of the specification.

Further the claim includes the unenabled extraction of the impurities from the aqueous phase by the extractant.

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1 and 3 are rejected for lacking utility since the use of an "extractant" (see claim 1) broadly would not be useful since it would extract the impurities and propylene oxide from the water without the selectivity to make the process useful.

Claims 1 and 3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. These claims read on contacting the aqueous phase with any kind of liquid including water.

Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
